Cloud Based
Virtual Healthcare Solution

Revolutionizing Remote Healthcare
during Emergencies

Ayush **Telemedicine**

n Clinic

The Ayush teleconsultation platform in Uttar Pradesh connects patients with doctors online for virtual consultations. Patients can access medical care from home, benefiting those in remote areas or with mobility issues.
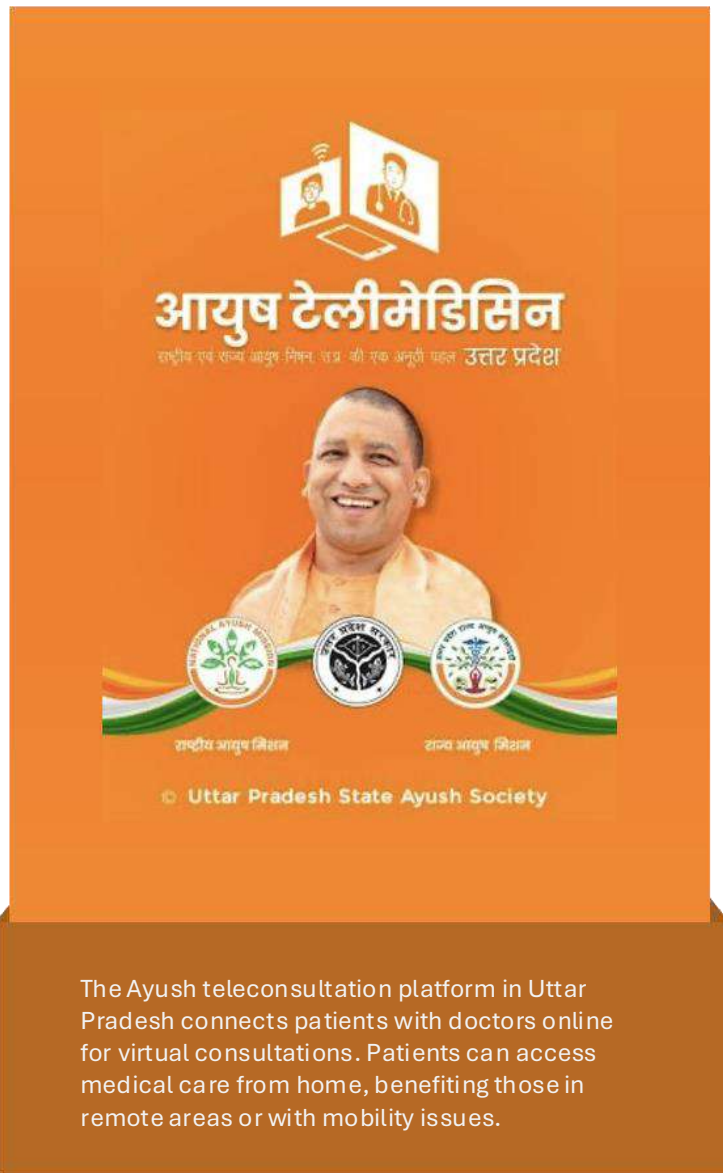

Introduction

The Ayush tele-consultation platform in Uttar Pradesh connects patients with doctors online, offering convenient virtual medical care from home, especially beneficial for those in remote areas or with mobility challenges.

One of the main benefits of the Ayush tele-consultation platform is that it allows patients to access medical care from the comfort of their homes without traveling to a clinic or hospital. This is especially useful for patients who live in remote or rural areas or those with mobility issues that make it difficult for them to travel.

TELEMEDICINE **ADVANTAGES**

Increased Access
Telemedicine provides rapid access to medical practitioners who may not be available in person.

Reduce Burden
Telemedicine enhances healthcare systems by improving access, efficiency, cost-effectiveness, and the patient experience.
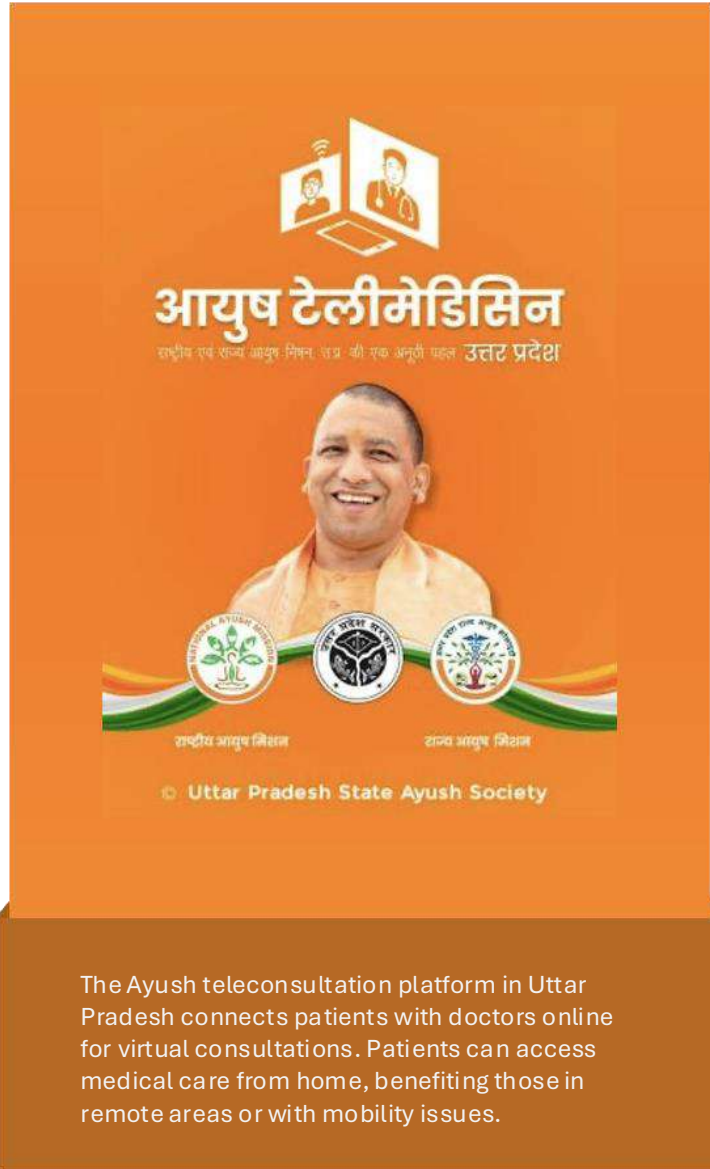

Record-Keeping & Legal Protection
Telemedicine enhances record-keeping, benefiting both doctors and patients by increasing legal protection through written documentation

Enhance Safety
routine checkups and continuous monitoring. It enhances safety for both patients and healthcare workers by avoiding exposure to contagious infections during outbreaks.

OUR SOLUTIONS

01 PeopleLink offered a complete telemedicine and tele-learning customized solution/application, which included an Android-based app that allows users to access the system from their mobile devices.

02 The solution also included a web app, which can be accessed from any internet-enabled device, providing greater accessibility to users.

03 The application included a Management Information System (MIS), reports for monitoring telemedicine solution performance and usage.

04 An Alerts system was also implemented in the application to notify practitioners and patients of upcoming appointments or important information.

05 The solution also provided a dashboard for practitioners and patients to view their appointments, treatment history, and other important information.

06 Video Calls & Cloud Services enabled virtual consultations for practitioners and patients. They also secure storage for medical records, images, and related documents.
