

Transform Learning

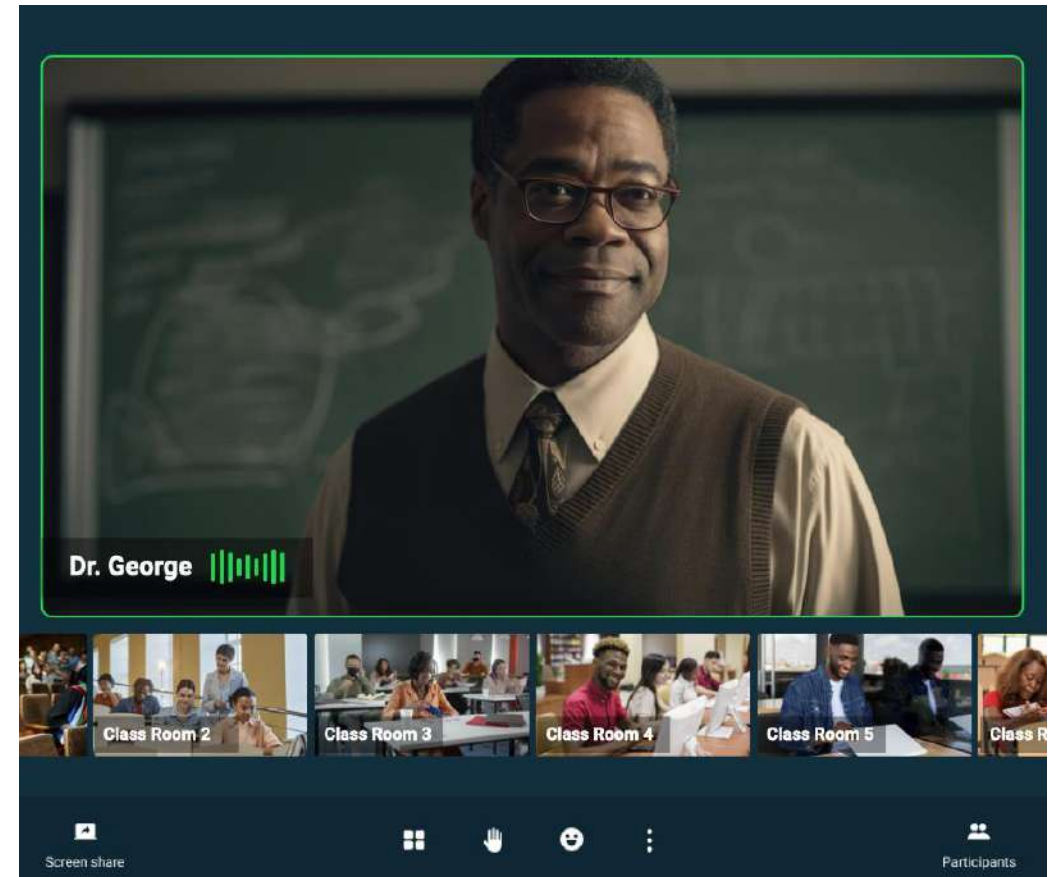

Cloud Based Virtual Classroom The Future Of Education.

Seamlessly transforms traditional classrooms into boundary-less virtual spaces, facilitating face-to-face interactions between students and teachers.

DMI-St. Eugene University - IVDL Zambia

120 Classrooms In Africa Under DMI-St. Eugene Now Uses instaVC's Video Conferencing Solutions (inClass) For E-Learning.

Case Study - DMI - ST.EUGENE

Connecting Classrooms Across Continents.

OVERVIEW

ST.EUGENE, a university overseeing 20 schools and colleges in India and 4 groups of African institutions through charitable foundations (DFT), sought a robust solution to connect classrooms in African nations with low bandwidth connectivity. They evaluated virtual classroom technologies from OEMs like Avaya (Radvision) and LifeSize.

CHALLENGES

The challenge lay in providing a reliable solution for collaborative learning across diverse classrooms with limited bandwidth in African institutions. **ST.EUGENE** needed a platform capable of facilitating multi-location e-learning sessions and accommodating expert guest speakers from around the world.

SOLUTIONS

ST.EUGENE opted for InstaVC's solution inClass, leveraging 20 studios to connect 120 classrooms across various African institutions. They chose InstaVC over other OEMs due to its robustness and scalability. With plans to expand further, they procured an additional 40 licenses within the financial period.

Implementation

Upon selecting InstaVC, ST.EUGENE swiftly deployed the solution across their institutions, seamlessly connecting classrooms for daily e-learning sessions. They progressively scaled up their server capacity, expanding from the initial 33 licenses to 143 ports. Additionally, they procured video accessories to enhance their conferencing capabilities.

Results

With InstaVC, DMI-St.Eugene successfully conducts multi-location e-learning classes across the African continent, overcoming connectivity challenges. The platform enables them to invite expert guest speakers from around the world, enriching the learning experience for their students and fostering global collaboration.

KEY METRICS

120 classrooms connected initially, expanding to 40 more licenses.

Server capacity expanded from 33 licenses to 143 ports

Successful multi-location e-learning sessions conducted across Africa.

Ability to invite expert guest speakers for global collaboration and knowledge sharing
